Dorf delivers more choice and style with the launch of three stunning new mixer ranges

In line with the latest in bathroom trends and designs, Dorf, Australia's leading tapware brand, has launched three new mixer ranges synonymous with high quality and elegance.

Dorf's much anticipated new Jovian, Minko and Arc mixer ranges will certainly impress householders who are seeking modern, contemporary tapware.

With sleek, European inspired aesthetics, the new collections provide peace of mind with the Dorf product warranty and also incorporate Dorf's water and energy efficient technology - delivering the perfect balance between water savings and optimum performance.

Jovian has a distinctive appearance, featuring sharp and intense lines combined with smooth edges to achieve a striking look for either the kitchen or bathroom.

Mixing premium quality with Oriental influenced design, the Minko collection of mixers will transform the feel of any bathroom with its sleek lines and chic design.

For minimalist bathrooms, the Arc range is the ideal option. With simple, straight lines and curved edges, the selection of Arc mixers will perfectly complement many bathrooms styles.

All mixers are fitted with an innovative cartridge for energy saving and water flow control which can be easily adjusted during installation, providing peace of mind and added water efficiency.

The Jovian, Minko and Arc ranges feature a basin mixer, wall basin mixer, bath/shower mixers and bath and shower outlets, which are ideal for the ultimate bathroom solution. Jovian also features a sink mixer for the kitchen.

Throughout the three collections, the basin mixers achieve a 5-star WELS rating, the sink mixer a 4-star WELS rating, while the showers are all 3-star WELS rated.

Dorf is part of the GWA International group of companies, Australia's leading supplier of sustainable fittings and fixtures for the home. GWA is at the forefront of product innovation and corporate responsibility, always focusing on the development of environmentally and economically safer technologies.
